

1. PROJECT TOPIC

My Portfolio

2. Introduction

This project is about my portfolio, and it showcases my skills and project details. This portfolio is responsive and user-friendly. In this portfolio, I have included my frontend skills, as well as my CV, GitHub ID, Instagram ID, and LinkedIn ID.

3. Components with Description

Navbar

In the navbar, there is a background video. On the left side of the navbar, my name is displayed, and on the right side, there are buttons like About, Skills, Contact, Projects, and Home.

Header

In the header, there is a hero container in which I have provided a small introduction about myself. There is also a button labeled "View Resume." When clicked, it will display my resume. Additionally, there is a "Contact" button that, when clicked, takes you to the contact section. I have also added a picture on the right side of the hero container.

Logo Container Section

In this section, I have added the logos of my skills, such as Bootstrap, CSS, HTML, C++, and Python.

About Me Section

In this section, I have provided a brief introduction about myself.

Skills Section

In this section, I have listed the names of my skills.

Projects Section

In the projects section, I have added all the projects I have completed.

Contact Me Section

In this section, you can contact me via my email or contact number.

Form Section

In the form section, there is a button. When clicked, the form will open, and you can fill it out.

Footer

In the footer section, I have added links to my LinkedIn, Twitter, Instagram, and GitHub accounts.

4. Tools and Technology

I created this project using HTML, CSS, and JavaScript.
